Internet Settings

Overview:  This guide explains how to configure your Internet settings for Mac computers.

Preparation:  Ensure that you have a network connection and have registered your computer before attempting to connect to external websites. If you are unable to view the Registration Page, the following instructions may help.

Procedure: Safari - Macintosh

1. Open Safari
2. Under Safari in the tool bar select Preferences.
3. In the window that pops up, click the Advanced tab at the top.
4. Click the Change Settings button.
5. In the Network window that opens up, make sure all of the proxy settings in the “Select a protocol to configure” list are unchecked, as well as any other proxy settings.
6. Click Apply Now if you made any changes.
7. Close the Network window.
8. Close the Advanced settings window.
9. Restart Safari and try again.
Mac - Firefox

1. Open Firefox
2. Under Firefox in the toolbar select Preferences.
3. In the Advanced window that pops up, click the Network tab.
4. Select "Configure how Firefox connects to the Internet," and then "Settings."
5. Select "Direct connection to the Internet." Then click "OK."
6. Close any remaining pop-up windows.

7. Click OK
8. Close the Advanced settings window.
9. Restart Firefox and try again.
